

The logo for ExCALIBUR 10, featuring the word 'EXCALIBUR' in white capital letters above the number '10' in white capital letters inside a red circle. The background of the entire slide is a perspective view of a server room with rows of server racks on both sides, illuminated with blue and orange light, creating a sense of depth and technology.

# **TRAINING RESEARCH SOFTWARE ENGINEERS IN ALGORITHMS FOR EXASCALE SIMULATIONS**

**Jemma Shipton**

**Engineer's House, 11-12 October 2023**

**UK Research  
and Innovation**

**UK Atomic  
Energy  
Authority**

---

# Project Outline

## Aims:

- Provide specialist training for RSEs in algorithms for exascale simulations, their implementation in software, application to domain science and optimisation on hardware.
- Strengthen collaboration between academia and industry by running training events that facilitate communication and knowledge transfer to the RSE community.
- Provide opportunities for RSEs to develop their own skills and interests and grow their peer-networks.
- Attract new entrants to the RSE community by providing taster sessions and hands-on experiences.
- Ensure that training is provided through a variety of models and is available in an easily updatable format online.

**Workshop:** Parallel-in-time algorithms (January 2023)

**Workshop:** Data-driven methods (January 2024)

**Summer School:** Algorithms for exascale simulations (July 2024)

---

# Current Challenges

- The first workshop was well received
- Making online materials available and keeping them up to date is time consuming
- Organising dates that work for enough people
- Trying not to over-fill time at events while also feeling like the right things are happening

The Summer School is intended as a platform for ExCALIBUR projects to offer training – get in touch if you're interested!!
